

Summary

Frontend Software Engineer with 1+ years of experience building responsive and scalable web applications using React.js, Next.js, and modern JavaScript. Strong in state management, API integration, and performance optimization. Passionate about solving complex problems and delivering high-quality user experiences.

Skills

Programming Languages: HTML, CSS, JavaScript, TypeScript, Java, SQL
Frontend: React.js, Next.js, Redux Toolkit, Tailwind CSS, Framer Motion, Shadcn UI
Tools: Git, GitHub, Postman, VS Code
Core Strengths: Data Structures & Algorithms, Problem Solving

Experience

Omninos Software Solutions	Software Developer Intern	October 2022 - April 2023
- Built responsive web applications using React.js , optimizing component rendering and reducing page load time by 25% to improve user experience. - Implemented centralized state management with Redux Toolkit , enabling predictable data flow and enhancing application scalability and maintainability. - Integrated REST APIs using Axios, managing asynchronous data flows with proper error handling to ensure reliable data processing.		
Mphasis Pvt. Ltd.	Associate Software Engineer	June 2021 - July 2022
- Improved enterprise HRM workflows in PeopleSoft through UI and process enhancements , streamlining internal operations. - Optimized MySQL database performance via query tuning and table maintenance, ensuring reliable data processing. - Automated and supported batch and BI processes, improving system stability and reducing manual intervention by 40%.		

Projects

Weather Application: Project Link	Frontend	March 2024 - June 2024
- Built a mobile-first, responsive weather application with React.js and Tailwind CSS , integrating real-time APIs for dynamic data retrieval. - Consumed external APIs using Axios with error handling and loading states for a reliable user experience. Created reusable components using Tailwind CSS, ensuring consistent UI and faster development.		
E-Commerce Website: Project Link	Backend	June 2023 - January 2024
- Built scalable RESTful APIs using Spring Boot for core e-commerce workflows. - Implemented layered architecture (Controller–Service–Repository) to improve code maintainability. - Enhanced MySQL performance via indexing and query optimization for efficient data processing.		

Education

Chandigarh University	Computer Science · B.Tech.	2015/09 - 2019/06
Developed an IoT-based obstacle-avoiding robot using ultrasonic sensors and microcontroller logic for real-time obstacle detection and autonomous navigation. The project was selected and presented at IIT Delhi .		

Certification

BOSSCODER ACADEMY	SDE Program	2024/12 - 2026/02
- Completed intensive training in Data Structures & Algorithms , including arrays, linked lists, stacks, queues, trees, graphs, and dynamic programming. - Solved 150+ coding problems to strengthen problem-solving and algorithmic thinking. - Studied System Design fundamentals , time & space complexity analysis, and real-world problem-solving approaches.
